

The Answer For Cleaning Thick HVAC/R Coils

Goodway's Innovative technology delivers high water flow with just the right amount of pressure.

CC-400HF – Deep Clean

Until now cleaning thick HVAC/R coils has posed a problem. Pressure washers deliver too much pressure damaging coils, and too little water flow to clean properly. The dirt just gets packed deeper and deeper, killing efficiency. Now Goodway has the ideal solution, the new Goodway CoilPro®-HiFlo. This innovative system delivers 400 PSI cleaning power at 3.0 gallons per minute flow rate. This combination delivers the perfect balance of water pressure and water volume to quickly and effectively flush dirt, debris, biological growth and more safely from thick evaporator and condenser coils. No more damaging high pressure spray from traditional pressure washers. It also comes with a variety of wand attachments to match perfectly to your application. And now you can even add your favorite coil cleaner solution, like CoilShine®, to clean even better.

ULTRA PORTABLE DESIGN

TOOL MANAGEMENT SYSTEM
HOLDS A VARIETY OF ATTACHMENTS

WORKS BEST WITH COILSHINE
FOAMING COIL CLEANER

FEATURES

- > Custom pumping technology
- > Portable rugged design
- > Integrated chemical siphon
- > High Flow 3 GPM at 400 PSI pressure
- > Ideal for cleaning thick HVAC and refrigeration coils
- > Includes various nozzles sectional wands and other attachments

CC-400HF

High Flow Portable Coil Cleaner including 25' power cord, 12' hose, spray gun with detachable 18" wand and two quick connect nozzles (soap and flat spray), 40" sectional wand and integrated chemical siphon
