SECTION 1 - PRODUCT AND COMPANY IDENTIFICATION

1.1 Product identifier

Product Name: CoilShine®-T
Product Codes(s): CoilShine-T
Synonym(s): None applicable
REACH Registration Number: No data available

1.2 Relevant identified uses of the substance or mixture and uses advised against

General use: HVAC coil cleaner
Uses advised against: No uses advised against

1.3 Details of the supplier and of the safety data sheet

Manufacturer/Distributor
Goodway Technologies Corp.
420 West Avenue
Stamford, CT 06902 USA
+1-203-359-4708; Toll free: +1-800-243-7932

1.4 Emergency telephone number: Chemtrec (24 hours) +1-800-424-9300; International: +1-703-527-3887

SECTION 2 - HAZARDS IDENTIFICATION

2.1 Classification of substance or mixture

Product definition: Mixture
Classification in accordance with 29 CFR 1910 (OSHA HCS)
Skin Irritant - Category 2 [H315]
Eye Irritant - Category 2A [H319]

2.2 Label Elements

Hazard Symbol(s):
GHS07

Signal Word: Warning

Hazard Statement(s):
H315 - Causes skin irritation
H319 - Causes serious eye irritation

Precautionary Statements:

[Prevention]
P264 - Wash hands or other skin areas contacting this product thoroughly after handling.
P280 - Wear protective gloves and eye protection.
P261 - Avoid breathing dust.

[Response]
P302 + P352 - IF ON SKIN: Wash with plenty of soap and water.
P321 - Specific treatment: Seek medical attention; refer to Section 4 of this SDS.
P332 + P313 - IF skin irritation occurs: Get medical attention.
P362 - Take off contaminated clothing and wash before reuse.
P362 - Take off contaminated clothing and wash before reuse.
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313 - IF eye irritation persists: Get medical attention.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence, require reporting in this section.
**SECTION 4 - FIRST AID MEASURES**

4.1 Description of first aid measures

- **Inhalation:** If product dust causes respiratory irritation or distress, move the exposed person to fresh air immediately. If breathing is difficult or irregular, administer oxygen; if respiratory arrest occurs, start artificial respiration by trained personnel. Loosen tight fitting clothing such as a collar, tie, belt or waistband. Seek medical attention if cough or other symptoms appear or persist.

- **Eyes:** Immediately flush eyes with large amounts of water for 15 minutes, occasionally lifting the upper and lower lids. Remove contact lenses, if present and easy to do, after the first 2 minutes and continue rinsing. Seek immediate medical attention, preferably from an ophthalmologist.

- **Skin:** Flush skin with large amounts of water while removing contaminated clothing and continue rinsing for at least 15 minutes. Wash contaminated clothing and shoes thoroughly before reuse. If skin irritation persists, seek medical attention.

- **Ingestion:** Rinse mouth with water, if victim is conscious. Remove dentures, if any. Give 1 - 2 cupfuls of water or milk if victim is conscious, alert and able to swallow. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious or convulsing person. Obtain immediate medical attention.

4.2 Most important symptoms and effects, both acute and delayed

Potential health symptoms and effects

- **Eyes:** Causes serious eye irritation. Symptoms may include redness, swelling, pain and tearing. The degree of injury depends on the concentration (if in solution) and duration of contact.

- **Skin:** Product solution may cause skin irritation. Symptoms include redness, itching, swelling and discomfort. May cause an allergic skin reaction (sensitization) which becomes evident upon re-exposure to product. The degree of injury depends on the concentration (if in solution) and duration of contact.

- **Inhalation:** Not expected to be a respirator irritating in pellet form. Dust from crushed pellets may cause irritation of the nose, throat and respiratory tract. Symptoms may include sore throat, cough and shortness of breath.

- **Ingestion:** Causes irritation of the gastrointestinal tract with nausea, vomiting, abdominal pain and diarrhea. May be harmful if swallowed.

- **Chronic:** Persons with pre-existing disorders of the skin or impaired respiratory function may be more susceptible to the effects of this substance. Prolonged and repeated skin contact may cause sensitization dermatitis.

4.3 Indication of any immediate medical attention and special treatment needed

Advice to Doctor and Hospital Personnel: Treat symptomatically and supportively. Symptoms may be delayed.

**SECTION 5 - FIRE FIGHTING MEASURES**

5.1 Extinguishable media

- **Suitable methods of extinction:** Use extinguishing media appropriate for surrounding fire.

- **Unsuitable methods of extinction:** None known

5.2 Special hazards arising from the substance or mixture

During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent or may be delayed. Obtain medical attention.

- **Explosion hazards:** Not considered to be an explosion hazard.

5.3 Advice for firefighters

Full protective equipment including self-contained breathing apparatus should be used. Water may be used to cool closed containers to prevent pressure buildup and possible autoignition or explosion when exposed to extreme heat. Fire fighters should try to contain water contaminated by this material from being discharged to any waterway, sewer or drain to prevent environmental contamination.

**SECTION 6 - ACCIDENTAL RELEASE MEASURES**

6.1 Personal precautions, protective equipment and emergency procedures

Ventilate the area. Evacuate non-essential personnel. Wear appropriate protective clothing designated in Section 8.

6.2 Environmental precautions

Avoid dispersal of spilled material or runoff, and prevent contact with soil and entry into drains, sewers or waterways.

6.3 Methods and materials for containment and cleaning up

Cover drains and contain spill. Spilled product can be reused. Collect product for reuse or place in an approved container for proper disposal. Minimize dust generation during clean-up. Carefully sweep, vacuum or shovel up crushed material and place into an approved container for proper disposal. Observe possible restrictions (Sections 7.2 and 10.5). Dispose of waste properly.

6.4 Reference to other sections

See Section 13 for additional waste treatment information.

**SECTION 7 - HANDLING AND STORAGE**

7.1 Precautions for safe handling

Wear all appropriate personal protective equipment specified in Section 8. Minimize dust generation. Do not get in eyes or on skin or clothing. If normal use of material presents a respiratory hazard, use only adequate ventilation or wear appropriate respiratory protection.

**Advice on protection against fire and explosion**

Not considered to be a fire or explosion hazard

7.2 Conditions for safe storage, including any incompatibilities

Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10.5), food and drink. Transfer only to approved containers having correct labeling. Keep container tightly closed to prevent moisture absorption. Protect container against physical damage. Containers that have been opened must be carefully resealed and kept upright to prevent spillage. Containers of this material may be hazardous...

8.2 Exposure controls

**Engineering measures:** Technical measures and appropriate working operations should be given priority over the use of personal protective equipment. Use adequate ventilation. Local exhaust is preferable.

**Individual protection measures:** Wear protective clothing to prevent repeated or prolonged contact with product. Protective clothing needs to be selected specifically for the workplace, depending on concentrations and quantities of hazardous substances handled. The chemical resistance of the protective equipment should be enquired at the representative supplier.

**Hygiene measures:** Facilities storing or using this material should be equipped with an eyewash station and safety shower. Change contaminated clothing. Preventive skin protection is recommended. Wash hands thoroughly after use, before eating, drinking or using the lavatory.

**Eye/face protection:** Wear safety glasses with non-perforated side shields.

**Hand protection:** Wear gloves recommended by glove supplier for protection against materials in Section 3. Gloves should be impermeable to chemicals and oil. Breakthrough time of gloves must be greater than the intended use period.

**Other protective equipment:** Protective clothing. Protective boots, if the situation requires.

**Respiratory protection:** None needed with normal handling. Wear an approved filter type dust respirator if needed when handling this product. Where risk assessment shows air purifying respirators are appropriate use a full-faced respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respiratory and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). Follow OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149.

**Environmental exposure controls:** Do not empty into drains.

9.1 Information on basic physical and chemical properties

- **Appearance:** Solid pellet, white with orange specks
- **Odor:** No data available
- **Odor Threshold:** No data available
- **Molecular Weight:** Not applicable
- **Chemical Formula:** Not applicable
- **pH:** 6.6 - 7.0 (1% aqueous solution)
- **Freezing/Melting Point, Range:** No data available
- **Initial Boiling Point:** Not applicable
- **Evaporation Rate:** Not applicable
- **Flammability (solid, gas):** Non-flammable
- **Flash Point:** Not applicable
- **Autoignition Temperature:** Not applicable
- **Decomposition Temperature:** Not determined
- **Lower Explosive Limit (LEL):** Not applicable
- **Upper Explosive Limit (UEL):** Not applicable
- **Vapor Pressure:** Not determined
- **Vapor Density:** Not determined
- **Density:** 640.7 kg/m³ (40 lb/ft³)
- **Viscosity:** No data available
- **Solubility in Water:** Soluble
- **Partition Coefficient: n-octanol/water:** No data available
- **Volatiles by Volume @ 21 ºF:** 0%

9.2 Other data

No data available

10.1 Reactivity

No special reactivity has been reported.

10.2 Chemical stability

This product is stable under recommended storage conditions, handling and use. Avoid contact with water and moist or wet environments.

10.3 Possibility of hazardous reactions

Hazardous polymerization does not occur.

10.4 Conditions to avoid

Contact with incompatible materials, moisture and high temperatures.
SECTION 11 - TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Acute Oral Toxicity
No data available

Acute inhalation toxicity
No data available

Acute dermal toxicity
No data available

Skin irritation/corrosion
Causes skin irritation

Eye irritation/corrosion
Causes severe eye irritation and possible eye damage

Sensitization
May cause skin sensitization in susceptible individuals.

Genotoxicity in vitro/in vivo
No data available

Mutagenicity
No data available

Specific organ toxicity - single exposure
No data available

Specific organ toxicity - repeated exposure
No data available

Aspiration hazard
No data available

11.2 Further information

Polyvinylpyrrolidone (CAS #9003-39-8): IARC Group 3 carcinogen - Not classifiable as to its carcinogenicity to humans. It is not listed by ACCIH, OSHA or NTP.

No data is available regarding the mutagenicity or teratogenicity of this product, nor is there any available data that indicates it causes adverse developmental or fertility effects.

Handle in accordance with good industrial hygiene and safety practice.

SECTION 12 - ECOLOGICAL INFORMATION

12.1 Toxicity

When used as directed, product is not considered to be hazardous to aquatic organisms and the environment. Discharge of large quantities of product to waterways may be harmful to the aquatic environment with long term effects.

12.2 Persistence and degradability

Readily biodegradable

12.3 Bioaccumulation potential

Product is not expected to bioaccumulate.

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available.

12.6 Other adverse effects

Additional ecological information

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

SECTION 13 - DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Methods of disposal: The generation of waste should be avoided or minimized whenever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable solid product in an approved landfill. Dispose of solutions through normal sump systems. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Hazardous waste: The classification of this product may meet the criteria for a hazardous waste.
