ScaleBreak®-Gel

INDUSTRIAL DESCALING CHEMICAL

OPTIMIZE YOUR TOWER HYGIENE, YOUR HEALTH IS IMPORTANT!

Goodway's ScaleBreak-Gel is a patented, innovative viscous gel formulated for descaling vertical surfaces like cooling tower fill.

When used in conjunction with Goodway's TFC-200 system, ScaleBreak-Gel adheres to vertical surfaces allowing its powerful descaling properties to penetrate and dissolve water formed deposits into a liquid suspension for easy removal.

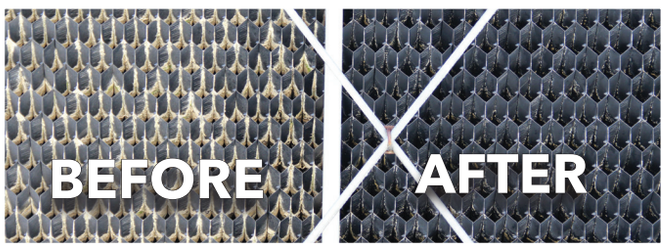
The application process is simple. Using the TFC-200 system, ScaleBreak-Gel is applied to the surface and allowed to activate for up to 60 minutes, depending on the severity of build-up. The gel at this stage will penetrate and dissolve scale deposits. Then, using the unique combination of high-pressure water and a patented turbo nozzle, remnants of scale and biological deposits are safely blasted away, leaving surfaces clean and looking great.

ScaleBreak-Gel is a completely water soluble product and is perfect for descaling cooling tower fill, tank walls or any other vertical surface.

TFC-200 COOLING TOWER FILL CLEANING SYSTEM

The TFC-200 is a patented application system designed to apply ScaleBreak-Gel to vertical surfaces, and then safely power wash deposits, without damage, leaving surfaces clean.

ScaleBreak-Gel is a perfect enhancement to your cooling tower aesthetics!



First, apply ScaleBreak-Gel, wait for the gel to do its work, then blast away the loosened scale with the TFC-200 patented turbo nozzle. Angled attachments allow for deep penetration of the tower fill, and the patented rotating turbo nozzle allows for aggressive rinsing of deposits over a large surface area.

SCALEBREAK-GEL IS PERFECT FOR DESCALING:

- Cooling Tower Fill
- Tank Walls
- Any Other Vertical Surface
