### 4. FIRST AID MEASURES

#### First Aid Measures

#### Eye contact

Immediately flush eyes with large amounts of water for 15 minutes, occasionally lifting the upper and lower lids. Remove contact lenses, if present and easy to do, after the first 2 minutes and continue rinsing. Seek immediate medical attention, preferably from an ophthalmologist.

#### Skin contact

Wash affected area with soap and water. Wash contaminated clothing and shoes thoroughly before reuse. Seek medical attention if irritation persists, if rash develops or if you feel unwell.

#### Inhalation

If product mist or spray causes respiratory irritation or distress, move the exposed person to fresh air immediately. If breathing is difficult or irregular, administer oxygen; if respiratory arrest occurs, start artificial respiration by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. If symptoms persist or become worse, seek medical attention immediately.

#### Ingestion

Rinse mouth with water, if victim is conscious. Remove dentures, if any. Give 1-2 cupfuls of water or milk if victim is conscious, alert and able to swallow. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious or convulsing person. Obtain immediate medical attention.

#### Most important symptoms and effects

#### Symptoms

Eyes: Causes moderate to severe eye irritation with redness, pain, tearing, swelling and possible blurred vision. Skin: May cause mild to moderate skin irritation. Repeated and prolonged use may result in drying or cracking of the skin or dermatitis. Inhalation: Inhalation of mist or spray may cause mild irritation of the respiratory tract. Ingestion: May be harmful if swallowed. May cause gastrointestinal irritation with nausea, vomiting, abdominal cramps and diarrhea.

#### Indication of any immediate medical attention and special treatment needed

#### Note to doctors

Treat symptomatically.

### 5. FIREFIGHTING MEASURES

#### Suitable Extinguishing Media

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

#### Unsuitable extinguishing media

None known.

<b>Specific hazards arising from the chemical</b>	Closed containers may explode due to the buildup of pressure when exposed to extreme heat. During emergency conditions overexposure to decomposition products may cause a health hazard. symptoms may not be immediately apparent or may be delayed. Obtain medical attention.
<b>Explosion Data</b>	
<b>Sensitivity to Mechanical Impact</b>	None.
<b>Sensitivity to Static Discharge</b>	None.
<b>Special protective equipment for fire-fighters</b>	Full protective equipment including self-contained breathing apparatus should be used. Water may be used to cool closed containers to prevent pressure buildup and possible autoignition or explosion when exposed to extreme heat. Fire fighters should try to contain water contaminated by this material from being discharged to any waterway, sewer or drain to prevent environmental contamination.

## 6. ACCIDENTAL RELEASE MEASURES

### Personal precautions, protective equipment and emergency procedures

**Personal precautions**                      Wear appropriate protective clothing designated in Section 8. Ventilate the area.

### Environmental precautions

**Environmental precautions**              Avoid dispersal of spilled material or runoff and prevent contact with soil and entry into drains, sewers or waterways.

### Methods and material for containment and cleaning up

**Methods for containment**                  Prevent further leakage or spillage if safe to do so.

**Methods for cleaning up**                  Cover drains and contain spill. Spilled product can be reused. Collect product for reuse or place in an approved container for proper disposal. Minimize dust generation during clean-up. Carefully sweep, vacuum or shovel up crushed material and place into an approved container for proper disposal. Dispose of waste properly.

**Prevention of secondary hazards**        Clean contaminated objects and areas thoroughly observing environmental regulations.

## 7. HANDLING AND STORAGE

### Precautions for safe handling

**Advice on safe handling**                  Observe label precautions. Wear all appropriate protective equipment specified in Section 8. Keep containers closed when not in use.

### Conditions for safe storage, including any incompatibilities

**Storage Conditions**                      Store in a dry, cool and well-ventilated area, away from incompatible materials, food and drink. Transfer only to approved containers having correct labeling. Keep container tightly closed to prevent moisture absorption. Protect container against physical damage. Containers that have been opened must be carefully resealed and kept upright to prevent spillage.

**Incompatible materials**                  Strong oxidizing agents Acids Bases

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### Control parameters

**Exposure Limits** This product, as supplied, does not contain any hazardous materials with occupational exposure limits established by the region specific regulatory bodies.

### Appropriate engineering controls

**Engineering controls** Technical measures and appropriate working operations should be given priority over the use of personal protective equipment. Use adequate ventilation. Local exhaust is preferable.

### Individual protection measures, such as personal protective equipment

**Eye/face protection** Wear protective goggles or safety glasses with unperforated side shields during use.

**Skin and body protection** Wear rubber gloves impermeable to chemicals and oil. Protective clothing. Protective boots, if the situation requires.

**Respiratory protection** None required with normal use. Always use an approved respirator when vapor/aerosols are generated.

**General hygiene considerations** Handle in accordance with good industrial hygiene and safety practice.
