BioSpray® Tower

It all starts with the health of your tower. BioSpray® Tower cooling tower cleaning solution will disinfect your hard, non-porous surfaces in one step. BioSpray® Tower kills 99.9% of Legionella pneumophila when applied properly on hard, non-porous surfaces, like cooling towers. Keeping your system clean will reduce the nutrients available for Legionella growth.*

Drift (small water droplets) from a contaminated cooling tower can carry Legionella and other bacteria as far as 2 miles from your facility! The bacteria can then enter the lungs infecting unsuspecting innocent people. Be proactive about your tower's overall health with regular preventative maintenance practices.
