

# A NATURAL WAY TO SURFACE SANITIZE

## GVC-18000 – Continuous Steam Power

The GVC-18000 dry steam cleaner offers safe, incredible cleaning performance for surface sanitation. Using the power of saturated dry steam, cleaning and sanitizing production and packaging equipment has never been more efficient. Our system delivers high pressure up to 145 PSI and heat up to 290° F to break down soils heavy buildup, and allergens on contact helping you to consistently deliver the results you need as part of your plant SSOPs. It also helps to kill mold, pathogenic bacteria, and other dangerous microorganisms.

## GVC-36000 – Heavy-Duty Power with Superior Results

Double the power of the GVC-18000, while still delivering up to 145 PSI and heat up to 290° F. Take on virtually any large scale cleaning project with nearly 0.25 gallons of dry saturated steam per minute. On demand, industrial strength dry steam eliminates bacteria, viruses and microorganisms. Reduce cleaning time and lower production down time. Clean your facility to the highest level of hygiene available in the cleaning industry. Powerful enough for production lines, yet gentle on machinery and electronics.

## GVC-1502 & GVC-1502-VAC – Tough and Effective

The GVC-1502 dry steam cleaner comes with and without integrated wet vacuum for extraction. Cleans a large selection of surfaces in a variety of environments, including work tables, seats, carts, beds, carpets, upholstery, desks, door handles and more. All without chemicals and large volumes of water. Loosens dirt, grease, and grime. The 290°F heat of the GVC-1502 kills bacteria, fungus, mold, mildew and other microorganisms on contact. Dry steam uses minimal amounts of water, but for applications where residual water is unacceptable, the GVC-1502-VAC and its integrated vacuum will leave surfaces dry.
