

CLEANING OVERHEAD AREAS HAS NEVER BEEN SAFER OR EASIER

NEW!

Carbon Fiber Vacuum Accessory Kit

The accumulation of combustible dust in factories and other industrial production settings can be a huge safety concern. Dust can settle on various surfaces, including overhead piping, support beams, and HVAC systems. Historically, dust removal has been a complicated, labor-intensive, and costly process, which leads to it often being overlooked. Carbon fiber vacuum extensions and tools from Goodway are a safer and more lightweight solution for cleaning these areas. The anti-static wands and conductive tools help reach those hidden areas without adding cost, risk, and labor of ladders or other platforms, while the specialized tools are designed to easily reach the top of pipes, support beams, and other areas.

Independently certified to be compliant with NFPA standards 484, 652, 654, ATEX 2014/34/EU*.

*Certified when used with a suitable, independently certified and approved vacuum system.

VAC-KIT-DIV2-D: (For DV vacuums), includes one carry bag..... **Call for Price**

VAC-KIT-DIV2-T: (For VAC-EX, VAC-2, VAC-3, AV-1200, and GTC-540 vacuums), includes one carry bag..... **Call for Price**

FEATURES

- Lightweight and effective
- Fully conductive
- Tested and certified to NFPA* and ATEX* standards
- Anti-static construction
- Reduce labor costs by completing cleaning quickly
- Clean hard-to-reach places
- Variety of attachments for multiple applications

IDEAL FOR:

- Production Facilities
- Food Processing Plants
- Packaging Facilities
- All interior & exterior overhead cleaning tasks
