

BIG BRUSHES FOR BIG TUBES

Brushes for smooth bore and internally enhanced tubes

SPECIALLY SIZED BRUSHES FOR TUBES 1" AND UP

NYLON BRUSHES:

Nylon Brushes are recommended for removing soft deposits (mud, algae, etc.) in straight, ferrous and nonferrous tubes. Order brush to correspond to tube I.D.

STAINLESS STEEL BRUSHES:

Stainless Steel Brushes are recommended for removing soft and light scale deposits in straight, ferrous tubes. Order brush to correspond to tube I.D.

BRASS BRUSHES:

Brass Brushes are recommended for removing soft and light scale deposits in straight, ferrous and nonferrous tubes. Order brush to correspond to tube I.D.

DUAL DIAMETER SPIN-GRIT BRUSHES:

Dual Diameter Spin-Grit Brushes are recommended for removing soft and light scale deposits in straight, ferrous and nonferrous internally enhanced tubes. The small diameter end of this brush cleans into the lands while the large diameter end cleans the grooves of the tube's rifling.

DUAL DIAMETER SPIN-GRIT

ESGB-100: Dual Diameter Spin-Grit Brush for tubes 1" I.D.	Call for Price
ESGB-125: Dual Diameter Spin-Grit Brush for tubes 1 1/4" I.D.	Call for Price

Note: ESGB brushes require a GTC-706 Coupling (Call for Price) to connect to GTC-720, GTC-721, GTC-721G and GTC-821 Flexible Shafts.

SPECIAL APPLICATION BRUSHES

CARBON STEEL BRUSHES:

Carbon Steel Brushes are recommended for removing soft and light scale deposits in straight, ferrous tubes. Order brush to correspond to tube I.D. (Not recommended for stainless steel tubes)

PLASTIC BRUSHES:

Plastic Brushes are recommended for removing soft deposits in straight, ferrous and nonferrous tubes. Order brush to correspond to tube I.D.

FOOD GRADE NYLON BRUSHES:

Food Grade Nylon Brushes are recommended for removing deposits in straight tubes and pipes in food processing facilities. The materials of the brush are compliant with FDA requirements for single and repeated use on food contact surfaces. Order brush to correspond to tube I.D.

SPRING FILLED BRUSHES:

Spring Filled Brushes are recommended for removing heavy scale deposits in straight, ferrous tubes. The spring bristles dig into the scale, breaking it free from the tube wall.
