PORTABLY AND EFFECTIVELY REMOVE SCALE DEPOSITS

GDS-C40 and GDS-C92 – Innovative Flow Reverser

If you are looking for smaller and portable descalers, your search ends here. GDS-C40, and its big brother, the GDS-C92, are constructed of heavy-duty polyethylene and acid-proof components. These units are strategically engineered for prolonged use in industrial applications.

The secret to their success at removing scale lies in the innovative flow reversal valve. No need to lose circulation time shutting down while disconnecting and making hose changes. The on-board tank allows for foam and CO2 to be released, eliminating potential pockets and speeding up the descaling process.

The GDS-C40 is perfect for brazed plate heat exchangers and with the flow reversal valve can even open plugged channels. The GDS-C92 steps up to mid-range equipment such as shell & tube heat exchangers or high efficiency package boilers.
