

EFFICIENT BI-DIRECTIONAL COILED BRUSH

Load in any direction... They don't care

Bi-Directional Coiled Brush

Goodway Bi-Directional Coiled Brushes can be shot from either end. They are color-coded for easy identification and feature durable nylon bristles set in a coil, wrapped around a wear resistant 3" polymer core. This design allows the brushes to be quickly inserted into the tubes, without regard to direction, and helps maximize the cleaning effectiveness and the life of the bristles.

They are ideal for removing soft to medium deposits from condenser and component heat exchanger tubes.

FEATURES

- Bi-directional for easy loading
- Reusable
- 3" long for larger cleaning surfaces
- For smooth bore tubes
- Piston design for maximum speed
- Compatible with QS-300, BSL-50
- Color-coded for easy identification
- Works with select non-Goodway guns

Coiled Tube Brush: Bi-directional 3" Coiled Tube Brushes
