DV-2-MET Versatile and Economical

For first-rate performance while separating chips from coolant, the DV-2-MET ChipMaster® is the machine you can depend on. Not only does it collect and separate chips down to 0.05", but it also recovers clumps due to a specially designed tangential intake port.

The ChipMaster's large, 7 gallon capacity basket will hold solids, while fluids easily drain into the tank. Choose between electricity or compressed air power to suit your needs.
