GDS-C40 Innovative Flow Reverser

If you are looking for smaller and portable descalers, your search ends here. The GDS-C40 is constructed of heavy-duty polyethylene and acid-proof components. The GDS-C40 is strategically engineered for prolonged use in industrial applications.

The secret to its success at removing scale lies in the innovative flow reversal valve. No need to lose circulation time shutting down while disconnecting and making hose changes. The on-board tank allows for foam and CO₂ to be released, eliminating potential pockets and speeding up the descaling process.

The GDS-C40 is perfect for applications under 60 gallons and with the flow reversal valve it can even open plugged channels.
